Professional Experience

Super Rad, Kathleen, GA | Lead Developer
June 2022–Present

- Spearheaded the setup and deployment of 10+ VPS servers for hosted clients on DigitalOcean, ensuring 99.99% uptime and high performance by implementing load balancing and regular performance monitoring.
- Automated daily backups for 60+ hosted websites, enhancing data security and reliability, reducing data loss risk by 90%.
- Overseeing the update and maintenance of 30+ WordPress websites, improving user experience and site functionality by reducing load times by 40%.
- Developed and implemented a subscription-based hosting model, generating consistent residual income of \$3,000/month and providing clients with reliable, managed hosting solutions.
- Optimized website performance, increasing Google PageSpeed scores from 40 to 100, significantly improving load times and user experience.

Ellucian, Remote | Senior Front End Developer
November 2012–June 2024

- Led end-to-end projects, transforming design mockups into fully customized WordPress themes for 15 large-scale multi-site implementations, some of which I designed.
- Maintained and optimized 30+ client websites, ensuring seamless operation, and ADA compliance which resulted in high client satisfaction and contract renewals.
- Developed responsive email templates for company newsletters, increasing engagement rates by 20%.
- Led the migration of 15+ websites, including a major upgrade from Drupal 7 to Drupal 9, ensuring data integrity and minimal disruption during the transition.

Sixteenbit, Freelance | Owner

May 2002–June 2022

- Specialized in responsive design, creating 50+ responsive websites. enhancing user experience and accessibility.
- Delivered comprehensive web, graphic design, and social media management services to a diverse client base, enhancing client online presence and engagement.
- Designed and developed HTML/CSS frameworks for elegant, functional websites and web-based applications, improving development efficiency.
- Converted 40+ designs into fully functional WordPress themes, tailored to client specifications, ensuring high client satisfaction and repeat business.

Disney Interactive, Remote | Senior Front End Developer

November 2015–March 2017

- Led the development of a major project, collaborating closely with Disney's design team to ensure design and functional requirements were met.
- Built a high-profile website using WordPress and a custom theme, ensuring adherence to all design and functional requirements, resulting in an on-time delivery.
- Delivered a high-quality, responsive, and fully functional website independently, impressing Disney's team and leading to additional projects to implement and update the same theme for separate sites.
- Created custom plugin development to connect customer APIs to the website, enhancing functionality and user experience.

Notable Projects

- **The Walt Disney Company**

Led the web development of a high-profile WordPress website using a custom theme, collaborated with Disney's design team to meet stringent design and functionality requirements, ensuring on-time delivery and high-quality standards.

- **M3 Chiropractic & Sports Medicine**

Collaborated with a designer to build a responsive WordPress site, managed all photography and content creation, and optimized the site for SEO and performance, ensuring a comprehensive and engaging online presence for the clinic.

- **The Great Unknown Productions**

Created a visually engaging, responsive website for Brie Larson's production company, integrated multimedia content, and provided ongoing maintenance and updates to ensure peak performance.

- **Punctuation**

Successfully migrated the website from an old domain to a new brand, maintaining SEO and search presence, developed a custom WordPress theme optimized for SEO and performance, and ensured minimal drop-off in search rankings.

- **Monday Night Brewing**

Collaborated with a design agency for a complete brand refresh, migrated assets to a CDN, and rebuilt the site using WordPress blocks, ensuring improved performance and modern content management.

- **Westside Atlanta Charter School**

Built a user-friendly website for the school, incorporating custom post types for events and news, and ensured the site met accessibility standards for educational institutions.

- **Markdown to Resume (this resume)**

Developed a tool to build my resume in a cleaner and more efficient way using coding, converting Markdown files into professional resumes. Designed to ensure ease of use and high-quality output.
